### Profile

A diligent, tech-savvy and goal-oriented individual proficiently equipped with frontend development skills and adequate knowledge of product lifecycle management. I seek to work as a front-end developer in an organization where my skills can be gainfully utilized and developed for the professional delivery of organizational targets.

### Skills

Excellent oral and written communication  
Customer service and relationship management

Frontend development with HTML, CSS, Tailwind, JavaScript, React JS, Next JS

### Professional Experience

06/2022 – present

#### Front-end Developer

*UBA Group*

- Developed modular and responsive user interfaces for internal and customer-facing applications with React and Next JS. Products are developed using agile methodology.
- Optimize existing applications for improved speed, usability, stability, and security.
- Perform application demo and testing with relevant stakeholders.
- Translate UI/UX design wireframes to actual readable code.
- Maintain application codebase with code versioning tools.

07/2021 – 06/2022

#### Frontend Developer

*Lampnets Solutions*

- Develop fully functional, cross-platform, cross-browser, and responsive end-to-end web user interfaces using React JS and CSS3/Tailwind CSS while integrating native and external libraries to implement needed features.
- Translate UI/UX design wireframes into high-quality reusable code.
- Application state management with react-redux.
- Integrate REST APIs with the user interface for data visualization and CRUD operations.
- Constantly monitor and enhance application performance through periodical codebase review, and fix detected bugs.
- Maintaining codebase history with git

08/2019 – 05/2022

### **Microsoft 365 Support Engineer**

*Tek Experts*

- Operate as a primary contact, delivering technical solutions for corporate customers around the world.
- Engage in collaborative troubleshooting with Senior Escalation Engineers (SEE) and Technical Leads when additional support is needed to meet service level agreements.
- Research infrastructure documentation and knowledge base articles and develop a detailed understanding of how Microsoft 365 works end-to-end, thereby improving customer experience.
- Thoroughly interact with products and report known issues or bugs to the product development team.
- Diligently document customer interactions using the provided request management system to accelerate ticket resolution and optimize company resources

02/2021 – 06/2021

### **Frontend Developer (Intern)**

*Zuri Team*

- Develop user-facing features of web applications using HTML, CSS, JavaScript, and React JS.
- Translate UI/UX design wireframes to actual code.
- Collaborate with back-end developers and web designers to improve usability.
- API integration for CRUD operations.
- Ensure that implemented web applications are accessible across different platforms – laptops, tablets, and mobile smartphones.
- Build and maintain reusable components.
- Maintain codebase history with git.
